

Watertanks and SP Watertanks

Watertanks

Hortilife B.V., supplier of water storage systems used in agriculture, horticulture, and industry. These systems are delivered not only in the Netherlands but also all over Eastern Europe. As Hortilife B.V. can provide you with storage tanks customized to local requirements and conditions, the successful HDP galvanized steel plate water tank has become a permanent asset in European glasshouse horticulture.

Silos

An HDP galvanized steel plate silo or basin can be deployed for almost any storage problem. You are assured of high quality, flexibility, simple assembly, very competitive prices, and clear information.

High quality

The use of materials of a constant high quality allows us to guarantee a proper end product.

Flexibility

Hortilife B.V. can provide you with a storage tank customized to local requirements and conditions. Obviously, a water tank for horticultural purposes in the cold northern region of Scandinavia has to meet other requirements than one to be used with high temperatures, like in southern Italy.

* For more dimensions and capacities, please contact us.

SP Watertanks

Hortilife B.V. introduces the SP watertank, a new range of tanks for export as these tanks consists of panels with a length of about 2,30 mtr to load these in a simple and economic way in a container or truck.

Panelheights, galvanizing, bolts and nuts remain the same, like our standard tank the SP tank also can be supplied as a coated tank.

The SP tank is supplied with the same liners as our standard tanks.

Dimensions an capacities deviate from the standard watertanks. For information please contact us.
