

# Benomic Horti Star

The successful Benomic Series has been enlarged with a new model – The BENOMIC HORTSTAR. This pipe rail wagon is a follow-on development of the current Benomic and includes improvements where they have been considered appropriate. The HORTI STAR is aimed mainly at plant care. As standard the wagon is fitted with a twin scissor hoist giving a platform height of 300 cm.

The smart design has resulted in placing an extremely versatile and competitively priced pipe rail wagon in the market.

#### Reliable technology

The BENOMIC HORTI STAR is a follow-on development of the current Benomic. The basic technology that has proved to be extremely reliable, has not been changed. You therefore benefit from the years of experience we have had with our Benomics.

#### Smooth exterior

The exterior of the Benomic was already smooth. But we go a step further with the HORTI STAR. Fewer corners and edges on the frame where dirt can pile up. This wagon is easier to keep clean and tidy. Plants are no longer damaged by sharp corners or edges. The railing is powder-coated.

#### Simplicity of maintenance

Servicing and maintenance is even easier. All the components requiring maintenance are accessible via a single cover plate.

#### Dashboard

The HORTI STAR is fitted with a robust, clearly laid out dashboard with a minimum of switches and knobs. Your employees can very quickly master the simple controls.

#### Technical Specifications

Wagon length	: 193 cm
Wagon width	: c.t.c. + 20 cm
Platform length	: 170 cm
Platform width	: 42 cm
Min. height	: 54 cm
Max. height	: 300 cm
Motor capacity	: 0,37 kW
Load capacity	: 250 kg
Weight	: 365 kg
Max. speed	: 60 m/min
Traction battery	: 24/110 V/Ah
Rail widths	: 42-60 cm

Enclosed scissors arms  
Rounded steelcorners  
Smooth finish on the end pieces

#### Versions

The BENOMIC HORTI STAR is only available with a twin scissor.

#### Optional

Centre-to-centre > 60 cm  
Vulcolan drive roller  
Wider drive + trailing roller  
Tool box  
350 cm platform height

#### Below we list the benefits of the BENOMIC HORTI STAR:

##### Scissor hoist

Finished with a smooth surface material and enclosed end pieces so that plants and string no longer get caught up in the scissor movement. The hoisting weight is 250 kg therefore more than sufficient for supporting two people.

##### Speed, power and controls

An efficient 0.37 kW electric motor with variable speeds up to 60 m/min.

##### Motor regulation

No more printed circuits, but instead a compact electronic drive regulator ensuring optimal drive over the whole range, from crawler right through to maximum speeds.

##### Welded frame

Robust steel frame. The plastic corners are replaced with steel end pieces on the HORTI STAR which provide maximum protection when being used.

##### Step-in height

The low step-in height that was popular on earlier models remains a feature.

##### Drive roller

The HORTI STAR is fitted with a steel drive roller as standard. Plastic rollers can be fitted if higher levels of comfort are required. Furthermore, the HORTI STAR can be fitted with wider drive and trailing rollers in order to prevent possible concrete damage.
